

DAY 4 - DYNAMIC FRONTEND COMPONENTS - MORENT CAR RENTAL WEBSITE

Rental E-Commerce Website

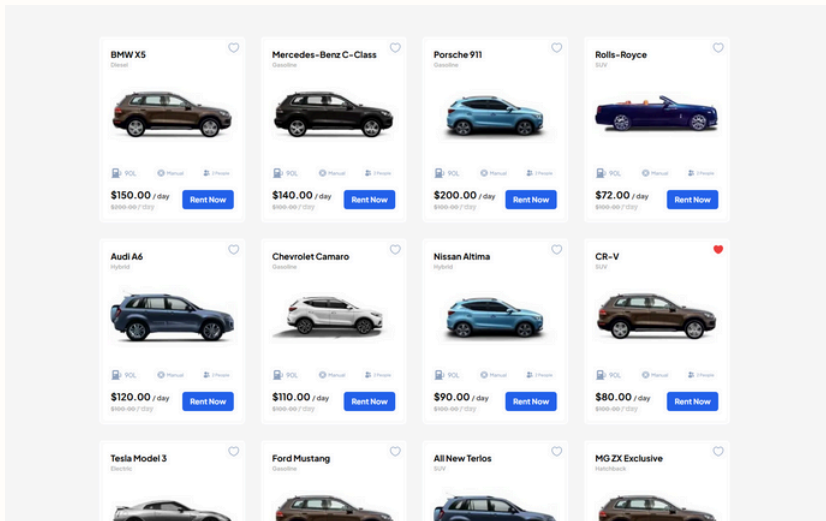

What functionalities i have implemented

Dynamically Showcasing Cars

Cars Listing Page

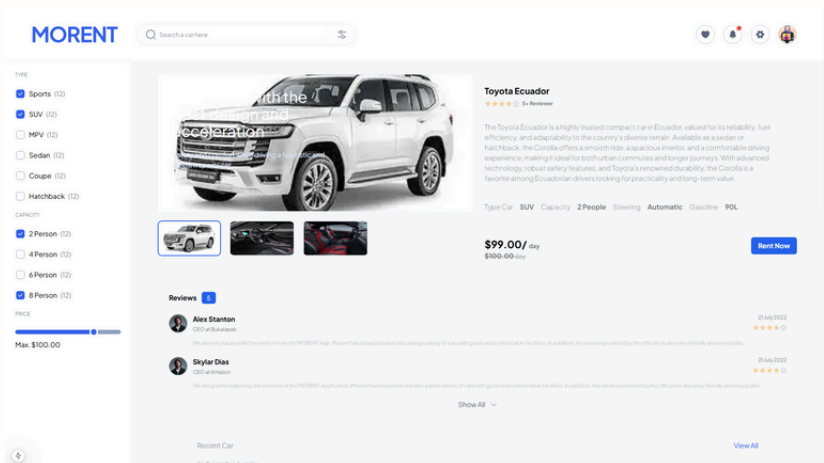

Users can scroll through a range of cars that are dynamically being fetched from sanity and being displayed to the user efficiently

Rendering Cars Details

Cars Detail Page

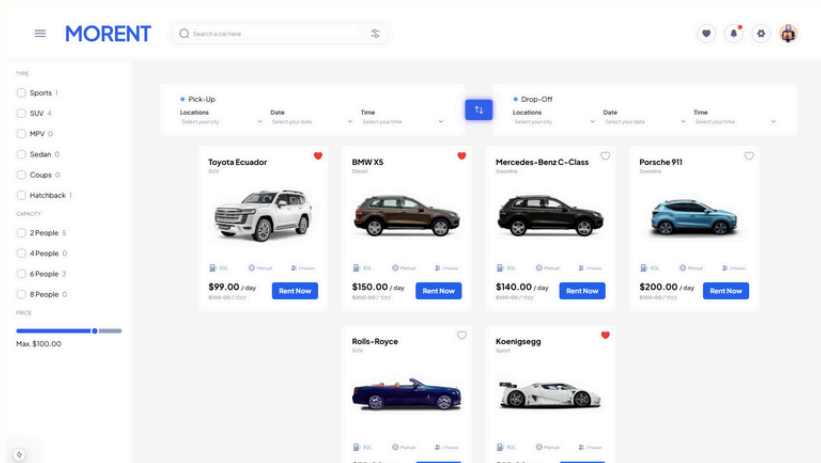

Cars details will be fetched from sanity as the user clicks on a car, the page will be redirected to that specific car's slug and i fetched that car from sanity using that slug and rendered data

Working Category Filter

Category Page

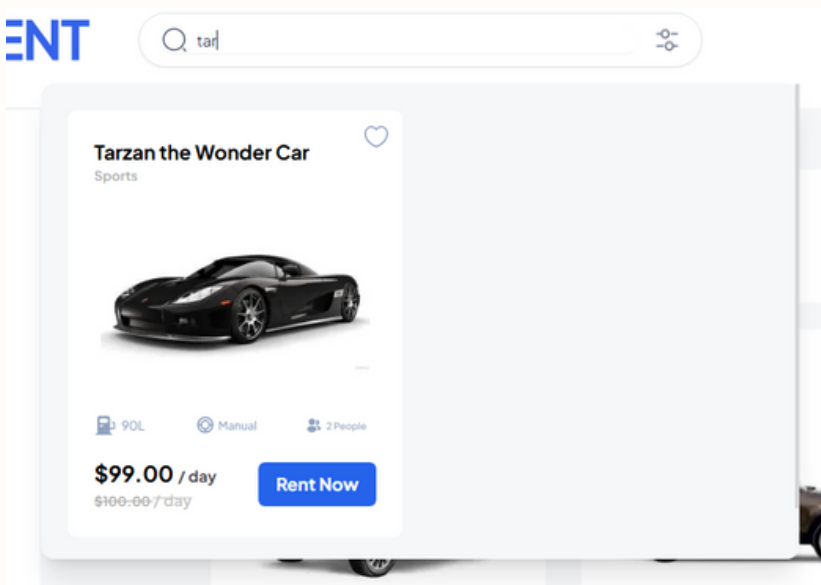

User can filter cars by types and capacity, this is done by adding multiple types inside one array and then filtering and checking if the type of car is inside this array

Search Functionality

Search Component

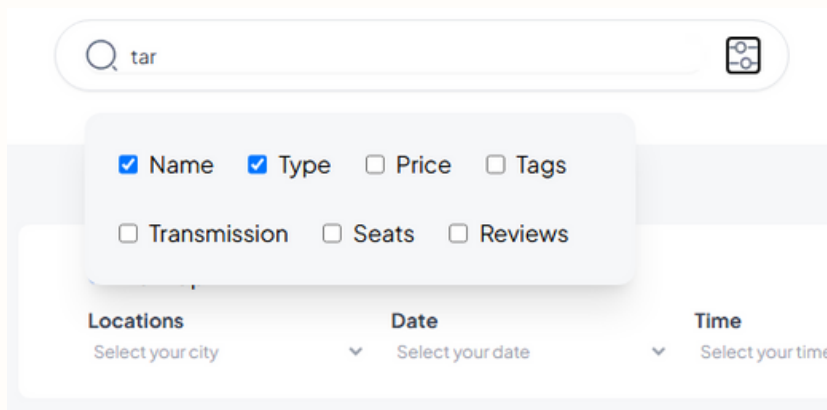

Users can search car easily by using this search component, cars will be searched by name, type etc...

Advance Search

Advance Search Component

Users can search by a variety of filters and can find what they want more specifically

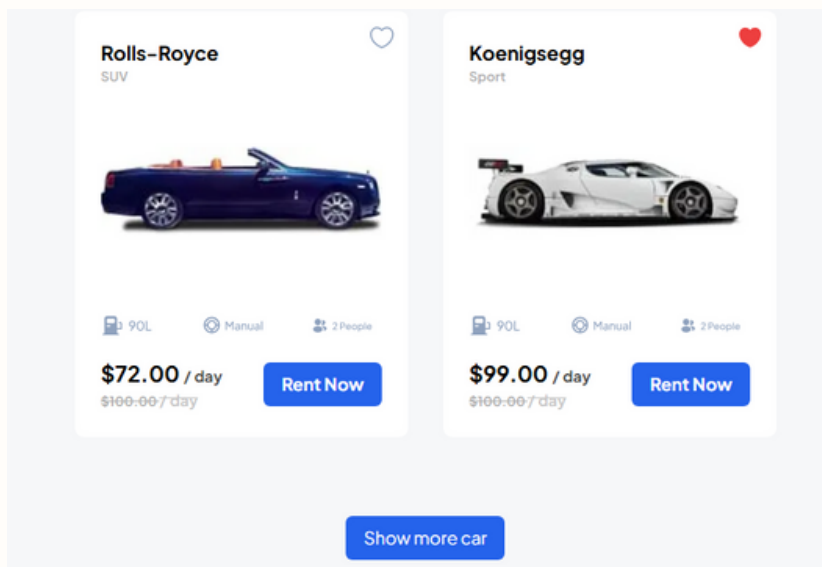

The image shows a search interface with a search bar containing the text 'tar' and a filter icon. Below the search bar is a filter menu with checkboxes for 'Name', 'Type', 'Price', 'Tags', 'Transmission', 'Seats', and 'Reviews'. Below the filter menu are three dropdown menus for 'Locations' (Select your city), 'Date' (Select your date), and 'Time' (Select your time).

Pagination

Show More Component

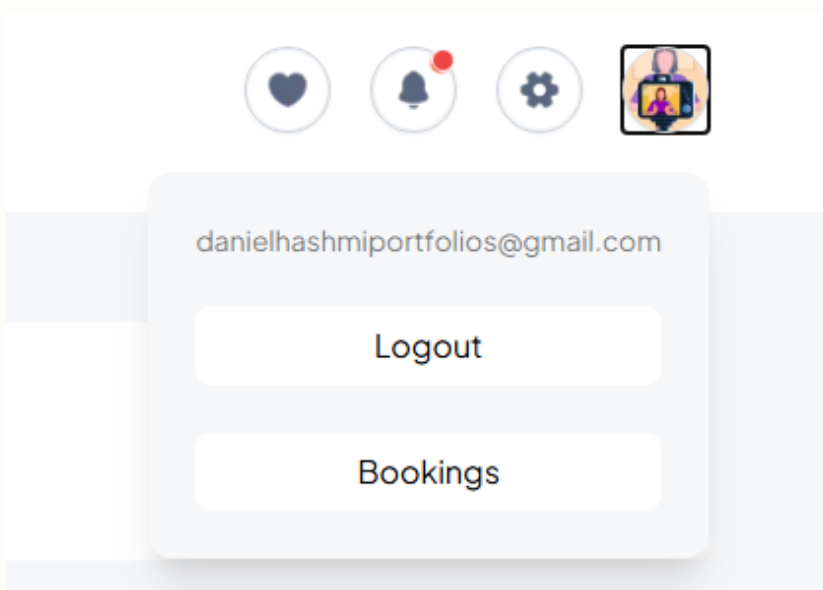

Show more button has been implemented to avoid showing all cars directly and save user's internet and for efficiency

User Profile

User Profile Component

Users can see their email and image and other navigations in this component

Favorites

Favorites Component

Here users can see their favorite cars that they have hearted, this component shows users only their favorite cars
